

Darshan M

Full Stack Developer | FastAPI • Node.js • React.js • Next.js • PostgreSQL

📍 Bengaluru, Karnataka ✉ darshanmpyd@gmail.com ☎ +91 8217317803 🔗 [LinkedIn](#) 📁 [GitHub](#) 🌐 [Portfolio](#)

Summary

Full Stack Developer with 2+ years of experience building scalable backend systems and AI-integrated web applications using FastAPI, Node.js, React, and PostgreSQL. Experienced in cloud deployments, backend optimization, and designing production-ready applications on AWS.

Experience

Product Engineer

Bengaluru

Edgeverve Systems Limited

Aug 2024 - Present

- Delivered production-grade full-stack features using FastAPI and Node.js, achieving sub-150ms API response times under production workloads.
- Implemented database partitioning, connection pooling, and Redis caching to improve query efficiency and support increased production traffic with consistent performance.
- Designed and maintained scalable backend APIs and asynchronous workflows to support high-volume dashboard operations and real-time data processing.

Product Engineer Intern

Bengaluru

Edgeverve Systems Limited

Feb 2024 - Jul 2024

- Created reusable UI components using React & Atomic Design, reducing frontend development time by 20%.
- Wrote efficient SQL queries, used JOINS, CTEs, and window functions, and optimized slow queries by 10%.

Machine Learning Intern

Bengaluru

Teachnook

Feb 2023 - Mar 2023

- Integrated classification and regression models into backend architectures by establishing efficient serialization and inference pipelines for application usage.

Education

Dayananda Sagar University

Bengaluru

B.Tech in Computer Science, CGPA 8.6

Dec 2020 - May 2024

Skills

Programming: Python, C++, JavaScript, TypeScript

Cloud: Amazon Web Services (EC2, S3, RDS, Lambda, IAM, CloudWatch)

Backend: Node.js, Express.js, FastAPI, REST APIs, Authentication (JWT), Microservices, System design, WebSockets

Frontend: React.js, Next.js, Hooks, Redux, Tailwind CSS, Responsive Web Design

Databases: PostgreSQL, Oracle, MySQL, MongoDB(NoSQL), Redis

DevOps & Tools: Git, Docker, Kubernetes, CI/CD Pipelines, Jenkins, Linux, Pytest, Jest, React Testing Library

AI/ML: Data preprocessing, Model integration, Vector Databases, RAG, Langchain

Projects

CommerceHub

- Engineered a scalable e-commerce platform using React, FastAPI, and PostgreSQL with secure authentication workflows and Redis caching for improved performance.
- Built an AI-powered recommendation and support system using embedding-based retrieval and a custom Telegram bot to enable personalized recommendations and automated customer interactions.

Conversational AI Knowledge Base (RAG Pipeline)

- Developed a Retrieval-Augmented Generation (RAG) chatbot using FastAPI and React, allowing users to upload and query documents including PDF, DOCX, PPTX, and CSV files through natural language interactions.
- Implemented dense vector search using sentence-transformers and ChromaDB, with fully local LLM inference through Ollama (LLaMA, TinyLlama) for privacy-focused document querying.

Achievements:

- 3.5★ rated programmer on CodeChef and 5★ programmer on HackerRank.
